

BACKEND SOFTWARE ENGINEER | PYTHON & DJANGO SPECIALIST

SUMMARY

Dedicated and focused Backend Software Engineer who excels at designing scalable architectures, developing robust APIs, and following through to achieve complex technical and project goals. Experienced in low-level systems programming and modern containerized web applications.

HIGHLIGHTS

- Python (Django, FastAPI)
- RESTful API Development
- Docker & Kubernetes
- C / C++ (Low-Level)
- AI / RAG Integration
- PostgreSQL / MySQL
- Git & CI/CD Pipelines
- Microservices Architecture
- Server & Network Config
- Algorithms & Raycasting
- Memory Management
- System Optimization
- Meticulous attention to detail
- Results-oriented
- Self-directed
- Strong problem solver
- Resourceful
- Dedicated team player
- Strong interpersonal skills
- Bilingual (English / Arabic)

EXPERIENCE

Backend Software Engineer / AI Integration Developer

June 2026 - Present

Independent Project | Ben Guerir, Morocco

- Architected and deployed a specialized backend system utilizing Python and Django.
- Developed a Retrieval-Augmented Generation (RAG) pipeline to process, analyze, and train AI models on resume datasets.
- Configured local environments and managed file paths to ensure secure and efficient data parsing.
- Utilized Docker to containerize applications, ensuring parity across development and deployment environments.
- Established and maintained robust database schemas for high-speed data retrieval.

Systems Programmer / Software Engineer

July 2025 - February 2026

42 Network | Ben Guerir, Morocco

- Engineered a fully functional HTTP/1.1 server (webserv) from scratch utilizing C++98 standards.
- Managed core networking logic, port binding, and complex routing for reliable data delivery.
- Developed "cub3d", a 3D rendering graphics project utilizing raycasting algorithms and the Digital Differential Analyzer (DDA) method.
- Diagnosed and resolved complex memory management and segmentation issues.
- Collaborated effectively with teammates on version control and system design architecture.

Technical Consultant / Freelance Developer

May 2026 - Present

pochettii.26 | Ben Guerir, Morocco

- Provided digital design and technical setup assistance for an e-commerce phone case storefront.
- Translated business requirements into actionable technical tasks and branding materials.
- Responded to inquiries and managed project scope to meet tight deadlines.

EDUCATION

Software Engineering Curriculum

1337 Coding School (42 Network) | Ben Guerir, Morocco

SKILLS

backend development, Python, Django, APIs, C++, C, Docker, Kubernetes, containerization, RAG, Artificial Intelligence, SQL, databases, Git, algorithms, raycasting, networking, HTTP servers, memory management, Linux, system architecture, Arabic, English, troubleshooting, analytical skills, code review, agile methodologies.
